

# Outdoor Patio Heater

Item # 61710

## DANGER

FOR YOUR SAFETY:

If you smell gas:

1. Shut off gas to the appliance.
2. Extinguish any open flame.
3. If odor continues, keep away from the appliance and immediately call your gas supplier or fire department.

## DANGER

DANGER indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.

## DANGER

Failure to comply with the precautions and instructions provided with this heater can result in death, serious bodily injury and property loss or damage from hazards of fire, explosion, burn, asphyxiation, and/or carbon monoxide poisoning. Only persons who can understand and follow the instructions should use or service this heater.

## WARNING

Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance. An LP-cylinder not connected for use shall not be stored in the vicinity of this or any other appliance.

## WARNING

Improper installation, adjustment, alteration, service or maintenance can cause property damage, injury or death. Read the installation, operation and maintenance instructions thoroughly before installing or servicing this equipment.

## WARNING

FOR OUTDOOR USE ONLY!

### BEFORE YOU BEGIN

Please read and understand this entire manual before attempting to assemble, operate or install this appliance. If you have any questions regarding the product, please call customer service **1-866-985-7877**, 9 a.m. – 6 p.m., EST, Monday – Friday.

This manual contains important information about the assembly, operation and maintenance of this patio heater. General safety information is presented in the first few pages and is also located throughout this manual. Keep this manual for future reference and to educate new users of this appliance. This manual should be read in conjunction with the labeling on the appliance. Safety precautions are essential when any mechanical or propane fueled equipment is involved. These precautions are necessary when using, storing, and servicing. Using this appliance with the respect and caution demanded will reduce the possibilities of personal injury or property damage. The following symbols shown below are used extensively throughout this manual. Always heed these precautions, as they are essential when using any mechanical or propane fueled equipment.

## DANGER

### EXPLOSION – FIRE HAZARD

- \* Keep solid combustibles, such as building materials, paper, or cardboard a safe distance away from the heater as recommended by the instructions.
- \* Provide adequate clearances around air openings into the combustion chamber.
- \* Never use the heater in spaces which do or may contain volatile or airborne combustibles, or products such as gasoline, solvents, paint thinner, dust particles or unknown chemicals.
- \* During operation, this appliance can be a source of ignition. Keep heater area clear and free from combustible materials, gasoline, paint thinner, cleaning solvents and other flammable vapors and liquids. Do not use heater in areas with high dust content. Minimum heater clearances from combustible materials: three (3) feet or 36 inches from top and two (2) feet or 24 inches from sides.

## DANGER

### EXPLOSION – FIRE HAZARD

- \* Never store propane near high heat, open flames, pilot lights, direct sunlight, other ignition sources or where temperatures exceed 120 degrees F (49 degrees C).
- \* Propane vapors are heavier than air and can accumulate in low places. If you smell gas, leave the area immediately.
- \* Never install or remove propane cylinder while heater is lighted, near flame, pilot lights, or other ignition sources or while heater is hot to the touch.
- \* This heater is red hot during use and can ignite flammables too close to the burner. Keep flammables at least 3 feet (36 inches) from top and 2 feet (24 inches) from sides. Keep gasoline and other flammable liquids and vapors well away from heater.
- \* Store the propane cylinder outdoors in a well ventilated space out of the reach of children. Never store the propane cylinder in an enclosed area (house, garage, etc.). If heater is to be stored indoors, disconnect the propane cylinder for outdoor storage.

## WARNING

We cannot foresee every use which may be made of our heaters.

Check with your local fire safety authority if you have questions about heater use.

Other standards govern the use of fuel gasses and heat producing products for specific uses. Your local authorities can advise you about these.

If no local codes exist, follow National Fuel Gas Code, ANSI Z223.1. In Canada, installation must conform to local codes. If no local codes exist, follow the current National standards of CANADA CAN/CGA-B 149.2.

## DANGER

### CARBON MONOXIDE HAZARD

- \* This heater is a combustion appliance. All combustion appliances produce carbon monoxide (CO) during the combustion process. This product is designed to produce extremely minute, non-hazardous amounts of CO if used and maintained in accordance with all warnings and instructions. Do not block the air flow into or out of the heater.
- \* Carbon Monoxide (CO) poisoning produces flu-like symptoms, watery eyes, headaches, dizziness, fatigue and possibly death. You can't see and you can't smell it. It is an invisible killer. If these symptoms are present during operation of this product get fresh air immediately!
- \* For outdoor use only.
- \* Never use inside house or other unventilated or enclosed areas.
- \* This heater consumes air (oxygen). Do not use in unventilated or enclosed areas to avoid endangering your life.

## WARNING

WARNING indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.

## WARNING: FOR OUTDOOR USE ONLY

### CARBON MONOXIDE HAZARD

This appliance can produce carbon monoxide which has no odor. Using it in an enclosed space can kill you. Never use this appliance in an enclosed space such as a camper, tent or home.

## SAFETY INFORMATION

### WARNING

California Proposition 65

Combustion by-products produced when using this product contain chemicals known to the State of California to cause cancer, birth defects, and other reproductive harm.

### WARNING

BURN HAZARD

- \* Never leave heater unattended when hot or in use.
- \* Keep out of reach of children.

### WARNING

Certain materials or items, when stored under the heater, will be subject to radiant heat and could be seriously damaged.

### CAUTION

SERVICE SAFETY

- \* Keep all connections and fittings clean. Make sure propane cylinder valve outlet is clean.
- \* During set up, check all connections and fittings for leaks using soapy water. Never use a flame to check for leaks.
- \* Use as a heating appliance only. Never alter in any way to use with any device.

### CAUTION

CAUTION indicates an imminently hazardous situation which, if not avoided, may result in minor or moderate personal injury, or property damage.

### WARNING

\* This product is fueled by propane gas. Propane gas is invisible, odorless, and flammable. An odorant is normally added to help detect leaks and can be described as having a "rotten egg" smell. The odorant can fade over time so leaking gas is not always detectable by smell alone.

\* Propane gas is heavier than air and leaking propane will sink to the lowest level possible. It can ignite by ignition sources including matches, lighters, sparks or open flames of any kind many feet away from the original leak. Use only propane gas set up for vapor withdrawal.

\* Store or use propane gas in compliance with local ordinances and codes or with ANSI/NFPA 58. Turn off propane when not in use.

### WARNING

\* Alert children and adults to the hazards of high surface temperatures. Stay away from these surfaces to avoid burning skin or igniting clothing.

\* Carefully supervise young children when in the vicinity of the heater.

\* Do not hang clothing or any other flammable materials from the heater, or place near the heater.

\* Replace any guard or protective device removed for servicing the appliance prior to placing back in service.

\* Installation and repair should be done by a qualified service person. The heater should be inspected before use and annually by a qualified service person. More frequent cleaning may be required as necessary. It is imperative that the control compartment, burners, and circulating air passageway of the appliance be kept clean.

## PACKAGE CONTENTS

PART	DESCRIPTION	QTY
A	Reflector Center Cap	1
B	Reflector Panels	4
C	Head Assembly	1
D	Burner Support Brackets	3
E	Tank Housing	1
F	Post/Post Support Plate	1
G	Hose/Regulator	1
H	Post Supports	3
I	Tank Chain	1
J	*Base	1
K	Wheel Bracket	2
L	Wheel Axle	2
M	Wheel	2
N	Grounding Brackets	3

**\*BEFORE ASSEMBLY:** Remove the Reflector Center Cap which comes packaged underneath the heater Base and is protected by a styrofoam insert.

## HARDWARE CONTENTS

					
M6X10 Bolt Qty: 10	M6 Nut Qty: 22	M6x15 Screw Qty: 16	M8x42 Screw Qty: 2	M8 Nut Qty: 2	
					
M8X16 Bolt Qty: 3	3/16" x 5/8" Screw Qty: 1	3/16" Nut Qty: 1	3/16" Washer Qty: 1	M6X20 Bolt Qty: 6	M5 Nut Qty: 6
					
M5X10 Screw Qty: 6	M6 Wing Nut Qty: 12	M6X10 Screw Qty: 12	M6X12 Wing Bolt Qty: 3	M6 Washer Qty: 3	M6 Nut Qty: 6

## ASSEMBLY

### PREPARATION

Before beginning assembly of this appliance, make sure all parts are present. Compare all parts with package contents list and hardware contents as listed on pages 5 and 6 of this manual. If any part is missing or damaged, do not attempt to assemble this product. Contact customer service for replacement parts.

**ESTIMATED ASSEMBLY TIME: 60 minutes**

### Tools Required for Assembly (NOT included):

Phillips screwdriver w/medium blade

Leak Detection Solution

Adjustable wrench (2) (**Note:** 10mm wrench or socket should fit M6 bolt; 13mm wrench or socket should fit M8 bolt.)

**NOTE:** This heater has an Electronic Ignition and will require installation of 1 – AAA battery. The battery should be installed by unscrewing the RED IGNITER BUTTON.

## ASSEMBLY

**1. OPTIONAL:** This heater comes with a Weighted Base to provide stability when assembled, but there are also 3 Grounding Brackets (N) that can be used to increase stability. If you wish to use this feature, you will NOT attach the Wheels to the Base. Instead, attach the Grounding Brackets (N) to the holes on the sides of the Base (J) with the M6x10 Bolts and M6 Nuts.

**Hardware Used:** 6 x M6x10 Bolt  
6 x M6 Nut

**2.** Center Wheel (M) in Wheel Axle (L) and insert 1 - M8x42 Screw through the center hole. Affix 1 - M8 Nut to the end of the screw. Repeat with second Wheel and Wheel Axle. Secure Wheel Axle (L) to the Wheel Bracket (K) with 4 - M6x15 Screws and 4 - M6 Nuts. Repeat with second Wheel Axle and Wheel Bracket. Align holes in Wheel Bracket (K) with corresponding holes in Base (J), and insert 4 - M6x15 Screws through holes and secure with 4 - M6 Nuts. Repeat with second Wheel Bracket.

**Hardware Used:** 16 x M6x15 Screw  
16 x M6 Nut  
2 x M8x42 Screw  
2 x M8 Nut

**3.** Attach the Post Supports (H) to the Base (J). Align the holes in the bottom of each Post Support with the hole on the Base. Insert 1 - M8x16 Bolt through the hole in the support and into the Base and hand tighten. Repeat with the other 2 Post Supports and then tighten all bolts with a wrench. Then affix the Tank Chain (I) to the bracket located on one of the Post Supports using a 3/16" x 5/8" Screw, 3/16" Washer and 3/16" Nut. Once you have secured the Tank Chain to the Post Support, you will later use it to secure the LPG tank by attaching it to the opposite side bracket.

**Hardware Used:** 3 x M8x16 Bolt  
1 x 3/16" x 5/8" Screw  
1 x 3/16" Washer  
1 x 3/16" Nut

## ASSEMBLY

**4.** Attach the Post/Post Support Plate (F) to the Post Supports (H). Align the Post/Post Support Plate (F) with the holes in the tops of the Post Supports (H) and insert M6x20 Bolts through holes. Secure on the underside with M6 - Nuts. Hand tighten initially then tighten with a wrench when all bolts have been inserted. Slide the Tank Housing (E) over the Post and rest on the Base.

**Hardware Used:** 6 x M6x20 Bolt  
6 x M6 Nut

4

**5.** Affix the Burner Support Brackets (D) to the Head Assembly using M5x10 Screws and M5 Nuts (2 per bracket/6 total of each.) Lift up the Tank Housing and support it on the Post Supports. Slide the Gas Hose/Regulator (G) up through the bottom of the Post and out of the top. Screw the Gas Hose onto the end of the Head Assembly. Tighten with a wrench to make sure it is secure. Then attach the Head Assembly (C) to the Post with 4 - M6x10 Bolts. Tighten the bolts.

**Hardware Used:** 6 x M5x10 Screw  
6 x M5 Nut  
4 x M6x10 Bolt

5

## ASSEMBLY

**6.** Assemble Reflector Panels (B) with Reflector Center Cap (A). Place two panels side by side. Insert M6x10 Screw into the open holes on the adjacent panel. Screw on a Wing Nut. Repeat these steps until all four panels are assembled. Then locate the Reflector Center Cap (A). Align the holes in the Center Cap with the Screws on each panel and affix with Wing Nuts to complete assembly.

**Assembly Tip:** If necessary for proper alignment of reflector sections, loosen each screw prior to further assembly and retighten after sections are aligned.

**Hardware Used:** 12 x M6x10 Screw  
12 x M6 Wing Nut

**7.** While supporting heater, tilt the Head Assembly and align the holes in the Reflector with the holes in the Burner Support Brackets. Slide M6 Washer over M6x12 Wing Bolt and screw Wing Bolt into the hole on the Burner Bracket. Repeat for the other two holes. Once you have tightened the Wing Bolts, return the heater to an upright position.

**Hardware Used:** 3 x M6x12 Wing Bolt  
3 x M6 Washer

**8.** Connect the regulator to the LP cylinder. The LP cylinder is sold separately. Use a standard 20 lb. propane cylinder only. Lift the Tank Housing (E) up and rest it on the top of the assembled Post Supports (H). Attach Regulator to valve on LP cylinder and hand tighten securely. Place LP tank onto base of heater and secure LP Tank on base by hooking Tank Chain (I) onto the Post Support (H). Lower the Tank Housing.

**NOTE:** Use this heater only with a propane vapor withdrawal supply system. See chapter 5 of the standard for storage and handling of liquefied petroleum gas, ANSI/NFPA 58. Your local library or fire department should have this book.

## ASSEMBLY

A minimum supply pressure of .5 psi is required for the purpose of input adjustment of propane gas. Storage of an appliance indoors is permissible only if the cylinder is disconnected and removed from the appliance. A cylinder must be stored outdoors in a well-ventilated area out of the reach of children. A disconnected cylinder must have dust caps tightly installed and must not be stored in a building, garage, or any other enclosed area. The minimum permissible gas supply pressure of 11 W.C. is required for purpose of hose adjustment. The minimum hourly of 17,500 BTU is required input rating for a heater for automatic operation rating less than full input rating.

The pressure regulator and hose assembly supplied with the appliance must be used.

The installation must conform with local codes, or in the absence of local codes, with national fuel gas code, ANSI Z223.1/NFPA54, natural gas and propane Installation Code, CSA B149.1, or propane storage and handling code, B149.2

A dented rusted or damaged propane cylinder may be hazardous and should be checked by your local cylinder supplier. Never use a propane cylinder with a damaged valve connection.

The propane cylinder must be constructed and marked in accordance with the specifications for LP gas cylinders of the U.S. Department of Transportation (DOT) or the standard for cylinders, spheres and tubes for transportation of dangerous goods and commission, CAN/CSA-B339.

The cylinder must have a listed overfilling prevention device.

The cylinder must have a connection device compatible with the connection for the appliance.

The cylinder used must include a collar to protect the cylinder valve.

Never connect an unregulated propane cylinder to the heater.

- Do not store a spare LP-gas cylinder under or near this appliance.
- Never fill the cylinder beyond 80 percent full.
- Place the dust cap on the cylinder valve outlet whenever the cylinder is not in use. Only install the type of dust cap on the cylinder valve that is provided with the cylinder valve. Other types of caps or plugs may result in leakage of propane.

## OPERATING INSTRUCTIONS

### Leak Test

- \* Perform all leak tests outdoors.
- \* Extinguish all open flames.
- \* NEVER leak test when smoking.
- \* Do not use heater until all connections have been leak tested and show no signs of leakage.

1. Make 2-3 oz. of leak test solution (one part liquid dishwashing detergent and three parts water).
2. Apply several drops of solution where hose attaches to regulator.
3. Apply several drops of solution where regulator connects to cylinder.
4. Make sure all patio heater valves are OFF.
5. Turn cylinder valve ON.

### IF BUBBLES APPEAR AT ANY CONNECTION, THERE IS A LEAK.

1. Turn cylinder valve OFF.
2. If leak is detected at hose/regulator connection, tighten connection and perform another leak test. If bubbles continue to appear, call our customer service hotline at **1-866-985-7877**, 9 a.m. – 6 p.m., EST, Monday – Friday.

## OPERATING INSTRUCTIONS

3. If leak is detected at regulator/cylinder valve connection, disconnect, reconnect, and perform another leak check. If you continue to see bubbles after several attempts, cylinder valve is defective. Call our customer service hotline at **1-866-985-7877**, 9 a.m. – 6 p.m., EST, Monday – Friday

**IF NO BUBBLES APPEAR AT ANY CONNECTION, THE CONNECTIONS ARE SECURE.**

**Note: Whenever gas connections are loosened or removed, you must perform a complete leak test.**

**WARNING:** FOR OUTDOOR USE ONLY

**CARBON MONOXIDE HAZARD**  
This appliance can produce carbon monoxide which has no odor. Using it in an enclosed space can kill you.  
Never use this appliance in an enclosed space such as a camper, tent or home.

**Caution:** Do not attempt to operate this appliance until you have read and understand all Safety Information in this manual and all assembly is complete and leak checks have been performed.

### **Before Turning Gas Supply ON:**

1. Your heater was designed and approved for OUTDOOR use only. Do NOT use it inside a building, garage, or any other enclosed area.
2. Make sure surrounding areas are free of combustible materials, gasoline, and other flammable vapors or liquids.
3. Ensure that there is no obstruction to air ventilation. Be sure all gas connections are tight and there are no leaks.
4. Be sure the cylinder cover is clear of debris. Be sure any component removed during assembly or servicing is replaced and fastened prior to starting.

### **Before Lighting:**

1. Heater should be thoroughly inspected before each use, and by a qualified service person at least annually. If re-lighting a hot heater, always wait at least 5 minutes.
2. Inspect the hose assembly for evidence of excessive abrasion, cuts, or wear. Suspected areas should be leak tested. If the hose leaks, it must be replaced prior to operation. Only use the replacement hose assembly specified by the manufacturer.

### **Lighting:**

#### **Lighting:**

**NOTE:** For initial start or after any cylinder change, hold the control knob in for 2 minutes to purge air from all gas lines before proceeding. **NOTE:** This heater has an Electronic Ignition and will require installation of 1 – AAA battery. The battery should be installed by unscrewing the RED IGNITER BUTTON.

1. Ensure the heater control knob is in the 'OFF' position then fully open the LP cylinder valve.
2. From the 'OFF' position, depress the control knob and turn counterclockwise 90° to the ignition position  and hold.
3. Press the RED igniter button until the burner lights, and then release the igniter button.
4. Continue to hold the control knob depressed for 15 to 30 seconds after the burner lights. Release the knob and check that the flame stays lit.
5. If the flame goes out, turn the control knob back to the 'OFF' position and wait 5 minutes then return to Step 2.
6. To operate the heater on high, turn the control knob counterclockwise toward HI. To decrease the flame, turn the control knob clockwise toward LO.

If you experience any ignition problems, please consult "Troubleshooting" on page 14.

**Caution:** Avoid inhaling fumes emitted from the heater's first use. Smoke and odor from the burning of oils used in the manufacturing will appear. Both smoke and odor will dissipate after approximately 30 minutes. The heater should NOT produce thick black smoke.

## ⚠ WARNING

### FOR YOUR SAFETY

Be careful when attempting to manually ignite this heater. Holding in the control knob for more than 10 seconds before igniting the gas will cause a ball of flame upon ignition.

### **When Heater is ON:**

Emitter screen will become bright red due to intense heat. The color is more visible at night. Burner will display tongues of blue and yellow flame. These flames should not be yellow or produce thick black smoke, indicating an obstruction of airflow through the burners. The flame should be blue with straight yellow tops. If excessive yellow flame is detected, turn off heater and consult "Troubleshooting" on page 14.

### **Re-Lighting:**

**Note:** For your safety, control knob cannot be turned OFF without first depressing the control knob and then rotating to OFF.

1. Turn control knob to OFF.
2. Wait at least 5 minutes to allow gas to dissipate before re-lighting.
3. Repeat the "Lighting" steps listed on page 11.

## ⚠ WARNING

### FOR YOUR SAFETY

Heater will be hot after use. Handle with extreme care.

### **Shut Down:**

1. Turn the control knob clockwise to .
2. Depress the control knob and turn further clockwise to the 'OFF' position. (Normally, burner will make a slight popping noise when extinguished).
3. Turn cylinder valve clockwise to OFF and disconnect regulator when heater is not in use.

**NOTE:** After use, some discoloration of the emitter screen is normal.

### **Operation Checklist:**

For a safe and pleasurable heating experience, perform this check before each use:

#### **Before Operating:**

1. I am familiar with entire owner's manual and understand all precautions noted.
2. All components are properly assembled, intact and operable.
3. No alterations have been made.
4. All gas connections are secure and do not leak.
5. Wind velocity is below 10 mph.
6. Unit will operate at reduced efficiency below 40 degrees F.
7. Heater is for use outdoors (outside any enclosure).
8. There is adequate fresh air ventilation.
9. Heater is away from gasoline or other flammable liquids or vapors.
10. Heater is away from windows, air intake openings, sprinklers and other water sources.
11. Heater is at least 36 in. on top and at least 24 in. on sides from combustible materials.
12. Heater is on a hard and level surface.
13. There are no signs of spider or insect nests in heater orifices.
14. All burner passages are clear.
15. All air circulation passages are clear.
16. Children and adults should be alerted to the hazards of high surface temperatures and should stay away to avoid burns or clothing ignition.
17. Young children should be carefully supervised when they are in the area of the heater.
18. Clothing or other protective material should not be hung from the heater, or placed on or near the heater.
19. Any guard or other protective device removed for servicing the heater must be replaced prior to operating the heater.
20. Installation and repair should be done by a qualified service person. The heater should be inspected before each use and at least annually by a qualified service person.
21. More frequent cleaning may be required as necessary. It is imperative that control compartment burner and circulating air passageways of the heater be kept clean and free of debris and/or spider or insect nests.

## OPERATING INSTRUCTIONS

### **After Operation:**

1. Gas control knob is in OFF position.
2. Gas tank valve is OFF.
3. Disconnect gas line.

## CARE AND MAINTENANCE

### **WARNING**

#### FOR YOUR SAFETY

- \* Do NOT touch or move heater for at least 45 minutes after use.
- \* Reflector is hot to the touch.
- \* Allow reflector to cool before touching.

To enjoy years of outstanding performance from your heater, make sure you perform the following maintenance activities on a regular basis:

### **Keep exterior surfaces clean.**

1. Use soapy water for cleaning. Never use flammable or corrosive cleaning agents.
2. While cleaning your unit, be sure to keep the area around the burner and control compartment dry at all times. Do not submerge the control valve assembly. If the gas control is submerged in water, do NOT use it. It must be replaced.
3. Air flow must be unobstructed. Keep controls, burner, and circulating air passageways clean. Signs of possible blockage include:
  - Gas odor with extreme yellow tipping of flame.
  - Heater does NOT reach the desired temperature.
  - Heater glow is excessively uneven.
  - Heater makes popping noise.
  - Spiders and insects can nest in burner or orifices. This dangerous condition can damage heater and render it unsafe for use. Clean burner holes by using a heavy-duty pipe cleaner. Compressed air may help clear away smaller particles.
  - Carbon deposits may create a fire hazard. Clean dome and burner screen with warm soapy water if any carbon deposits develop.

*Note: In a salt-air environment (such as near an ocean), corrosion occurs more quickly than normal. Frequently check for corroded areas and repair them promptly.*

### **TIP (FOR STAINLESS STEEL MODELS):**

***Use high-quality automobile wax to help maintain the appearance of your heater. Apply to exterior surfaces from the post down. DO NOT apply to emitter screen or domes.***

### **Storage:**

Between uses:

- Turn control knob OFF.
- Disconnect LP source.
- Store heater upright in an area sheltered from direct contact with inclement weather (such as rain, sleet, hail, snow, dust and debris).
- If desired, cover heater to protect exterior surfaces and to help prevent build-up in air passages. Never leave LP cylinder exposed to direct sunlight or excessive heat.

***Note:*** Wait until heater is cool before covering.

### **Service:**

Only a qualified service person should repair gas passages and associated components.

***Caution:*** Always allow heater to cool before attempting service.

## TROUBLESHOOTING

If you have any questions regarding this product, please call our customer service hotline at 1-866-985-7877, 9a.m. – 6 p.m. (EST), Monday – Friday, or email us at [cservice@welltraveled.net](mailto:cservice@welltraveled.net).

PROBLEM	POSSIBLE CAUSE	CORRECTIVE ACTION
Main burner will not light	Gas valve may be off	Turn gas valve ON
	Fuel tank may be empty	Refill LPG tank
	Orifice blocked	Clean or replace orifice
	Air in supply system	Purge air from lines. Open gas lines and depress control knob for 2-3 mins.
	Loose connection	Check all fittings
	Igniter fails	Use stick lighter to manually light
	Gas pressure low with valve open full	Replace cylinder or regulator
	New cylinder or 1st ignition	Purge air from lines
	Cylinder valve on, no gas flow	Replace hose/regulator assembly
	AAA Battery behind igniter button is dead	Replace with a new AAA Battery
Low burner flame	Pressure is low	Replace LPG tank
	Tank is low on fuel	Fill LPG tank
	Gas hose is kinked	Check & straighten or replace
	Control knob at max	Check for obstruction at passageways and orifices
Burner unit	Carbon on reflector & emitter screen	Clean components as needed
	Thick black smoke	Blockage in burner assembly--thoroughly clean burner

## REPLACEMENT PARTS LIST

PART	DESCRIPTION	QTY
A	Reflector Center Cap	1
B	Reflector Panels	4
C	Head Assembly	1
D	Burner Support Brackets	3
E	Tank Housing	1
F	Post/Post Support Plate	1
G	Hose/Regulator	1
H	Post Supports	3
I	Tank Chain	1
J	*Base	1
K	Wheel Bracket	2
L	Wheel Axle	2
M	Wheel	2
N	Grounding Brackets	3

**\*BEFORE ASSEMBLY:** Remove the Reflector Center Cap which comes packaged underneath the heater Base and is protected by a styrofoam insert.

### **1 YEAR LIMITED WARRANTY – Customers in the Continental US**

All components are warranted for a period of 1 year after date of purchase by the original owner against defects in materials and workmanship under normal use. This warranty does NOT cover normal wear and weathering, assembly and/or maintenance OR use in a commercial application if model is not designated as a commercial model. At Well Traveled Living's sole discretion, products under warranty will be repaired and/or replaced at no charge to the customer. Any returns sent back to Well Traveled Living must be sent via prepaid freight and in the original retail packaging.

For warranty service contact Well Traveled Living at the address, phone numbers or internet site and email listed in this owner's manual. Be sure to have your sales receipt, date of purchase and catalogue/model numbers available when calling. All warranty service will be coordinated by the Well Traveled Living's, Amelia Island, Florida service center.

This warranty is extended only to the original purchaser. Proof of purchase will be required before warranty service is rendered. The sales receipt is the only valid proof of purchase. This warranty only covers failures due to defects in materials or workmanship which occur during normal use. Failures and/or damage which result from accident, negligence, misuse, abuse, neglect, mishandling, alteration or modification, failure to maintain, improper assembly or maintenance, service by unauthorized agency or use of unauthorized components or damage that is attributable to acts of God are NOT covered.

**\*\*\*THERE ARE NO EXPRESS WARRANTIES EXCEPT AS LISTED ABOVE\*\*\***

**\*\*\*PURCHASER ASSUMES ALL RISKS IN THE ASSEMBLY AND OPERATION OF THIS UNIT\*\*\***

**\*\*\*FAILURE TO FOLLOW WARNINGS AND OPERATIONAL INSTRUCTIONS CONTAINED IN THIS MANUAL CAN RESULT IN SEVERE PROPERTY DAMAGE AND/OR PERSONAL INJURY\*\*\***

**IN NO EVENT WILL WELL TRAVELED LIVING, OR ITS DIRECTORS, OFFICERS OR AGENTS BE LIABLE TO THE PURCHASER OR ANY THIRD PARTY, WHETHER IN CONTRACT, IN TORT, OR ON ANY OTHER BASIS, FOR ANY INDIRECT, SPECIAL, PUNITIVE, EXEMPLARY, CONSEQUENTIAL, OR INCIDENTAL LOSS, COST, OR DAMAGE ARISING OUT OF OR IN CONNECTION WITH THE SALE, MAINTENANCE, USE, OR INABILITY TO USE THE PRODUCT, EVEN IF WELL TRAVELED LIVING OR ITS DIRECTORS, OFFICERS OR AGENTS HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH LOSSES, COSTS OR DAMAGES, OR IF SUCH LOSSES, COSTS, OR DAMAGES ARE FORESEEABLE. IN NO EVENT WILL WELL TRAVELED LIVING, OR ITS OFFICERS, DIRECTORS, OR AGENTS BE LIABLE FOR ANY DIRECT LOSSES, COSTS OR DAMAGES THAT EXCEED THE PURCHASE PRICE OF THE PRODUCT.**

**SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO THE PURCHASER.**

This limited warranty gives you specific legal rights and you may also have other rights which vary from jurisdiction to jurisdiction. The provisions of the United Nations Convention on Contracts for the Sales of Goods shall not apply to this limited warranty or the sale of products covered by this limited warranty.
